

## 任 務

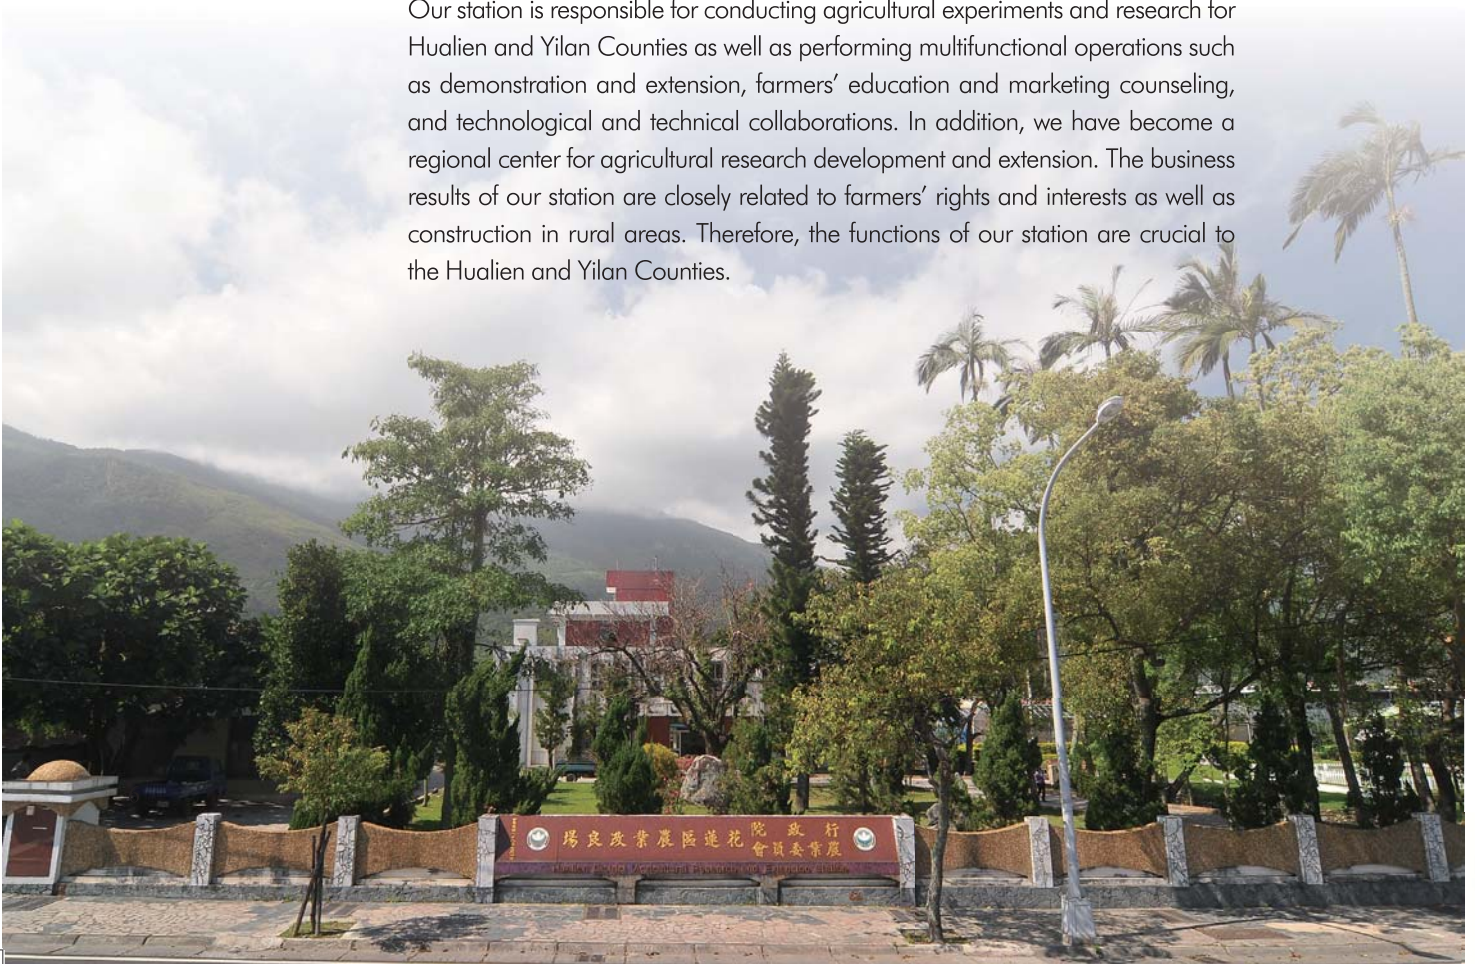

本場負責花蓮、宜蘭二縣農業試驗研究、示範推廣、農民教育與產銷輔導及科技、技術合作等多功能業務，並成為區域性農業研究發展與推廣中心。本場業務成效與農民權益及農村建設息息相關，因而本場於花蓮、宜蘭二縣之功能益形重要。

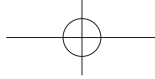

本場任務包括負責轄區之農業試驗研究及示範推廣，促進地區及原住民產業發展，提供農業技術諮詢及病蟲害、土壤、植物營養診斷等各項服務，即時解決農民問題。傳播農業政策、技術及農情資訊，增進知識經濟效益；舉辦農業輔導人員與農民教育訓練，提升農業人力知能及素質。促進科技與技術之合作、訓練與交流，強化研發能量及效率；掌握地區農業疫情資訊，重視危機管理並迅速有效解決問題。協助地區天然災害調查，輔導作物災害復耕及產業復建，減低農民損失，迅速恢復生產以穩定市場供需。

本場以藍海思維規劃研發專業領域，分為樂活有機、健康安全及原住民產業輔導三大主軸，期發揮本場「小而美」的核心價值。🌿

## Mission

Our station is responsible for conducting agricultural experiments and research for Hualien and Yilan Counties as well as performing multifunctional operations such as demonstration and extension, farmers' education and marketing counseling, and technological and technical collaborations. In addition, we have become a regional center for agricultural research development and extension. The business results of our station are closely related to farmers' rights and interests as well as construction in rural areas. Therefore, the functions of our station are crucial to the Hualien and Yilan Counties.

Our station is responsible for conducting agricultural experiments and research as well as demonstrations and extension, promoting the development of the regional and indigenous industries, and providing various services such as agricultural technical consultation and diagnoses for pests, soil, and plant nutrition to promptly resolve farmers' problems in areas under our jurisdiction. In addition, we disseminate information such as agricultural policies, related technology, and agricultural situation information to the public; we elevate the knowledge, skills, and qualities of the agricultural labor force by organizing vocational education and training for agricultural counseling staff and farmers. Furthermore, we strengthen research and development capacity and efficiency by facilitating scientific and technological collaboration, training, and exchanges; we possess full awareness of the agricultural epidemics information of the district, emphasize crisis management, and rapidly and effectively resolve related problems. Lastly, we assist in the investigation of natural disasters in the district and provide counseling for postdisaster crop and industry rehabilitation to reduce farmers' losses and to enable rapid resumption of production to stabilize market supply and demand.

Our station adopted the blue ocean strategy to develop the professional field, dividing the field into the development of organic food, promotion of health and safety, and provision of counseling for the aboriginal agricultural industry. The objective is to realize the core values of a station that is "small but powerful." 🍌
