

With great agriculture environment, the tribe will become prosper and rich

You could say it was fate more than coincidences. For all these years, the programs Pangcah Organic Farm has worked with are closely related to its goals. It feels like the government financial supports just come automatically to help. “Actually, we just planed according to our own goals, so everything looks like so coincidental” said Su Hsiu Lien, if you work hard and always to be prepared, then the helps will come. Everything you want to do can be achieved successfully, “just follow the trend, it will take you where you should be.”

Back to the purpose of establishing Pangcah Organic Farm, the strict owner recalls: “We want to help the aboriginal people to earn the opportunity to improve their lives by practicing organic farming.” She said, because agriculture is the fundamental of all aboriginal activities. First the agriculture, and then follows the weaving, songs, and activities such as Harvest Festival. Only with the great agriculture environment can the tribe become prosper and rich.

To improve the lives through organic farming needs more organic farms. So Su Hsiu Lien trained her employees to establish their own farms and helped other peasants generously. With the last 4 years, a lot of organic farms established with the help of Pangcah Organic Farm. This is a very fast development from others eye, but for Su, “I felt that I could help and affect more people.”

For some people, this ideal maybe impracticable, but for Su Hsiu Lien, that’s her expectation for all these years: “I hope one day there will be a lot of newly established organic farms , then Pangcah Organic Farm will step back and give way to them!” □
